

PERKINELMER INFORMATICS CONNECTOR FOR MEDIDATA RAVE®

Faster Answers with Smarter Workflows

PerkinElmer's Connector for Medidata Rave® allows quick access to clinical, operational and audit data in an industry standard CDISC ODM format. The connector facilitates the instantaneous export of Medidata Rave® data and creates one TIBCO Spotfire® data table per form / view thereby enabling the power of exploration of Medidata Rave® data in TIBCO Spotfire® with a few clicks. The benefit of this connectivity is clinical development teams can run their analytic workflows directly against the source EDC data bringing clinical development teams closer to the source data, improving the quality and speed of decision making.

Automation capabilities eliminate the need for manual refreshes of the Medidata Rave® data providing Clinical IT groups a low-maintenance solution. Timely and accurate data can be provided to key decision makers thus accelerating the time to market for therapeutics across the entire portfolio of clinical candidates.

Automatically export Clinical, Operational and Audit data from Medidata Rave® in the industry standard CDISC ODM format for fast analysis in TIBCO Spotfire®.

TIBCO Spotfire®

PerkinElmer is the exclusive global distributor of the TIBCO Spotfire® platform for certain scientific and clinical R&D applications.

AT A GLANCE

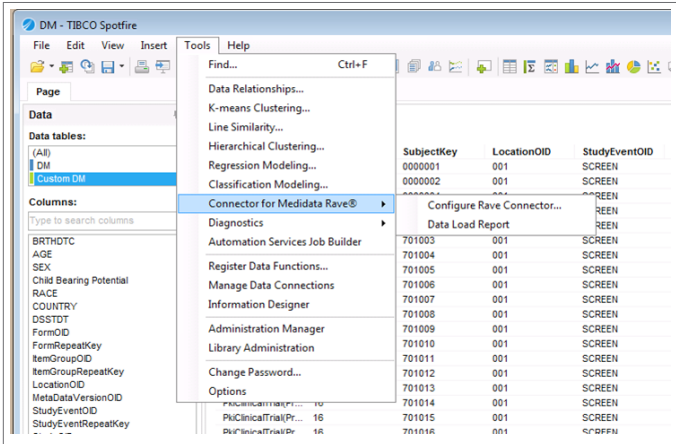

- Eliminate the need to manually export data from Medidata Rave®
- Pre-built solution to extract, transform and load EDC data into TIBCO Spotfire®
- Connector is based on a robust and scalable architecture
- Easily Maintained
- Intuitive User Experience
- Automate Data Extracts

RETURN ON INVESTMENT FROM CUSTOMERS:

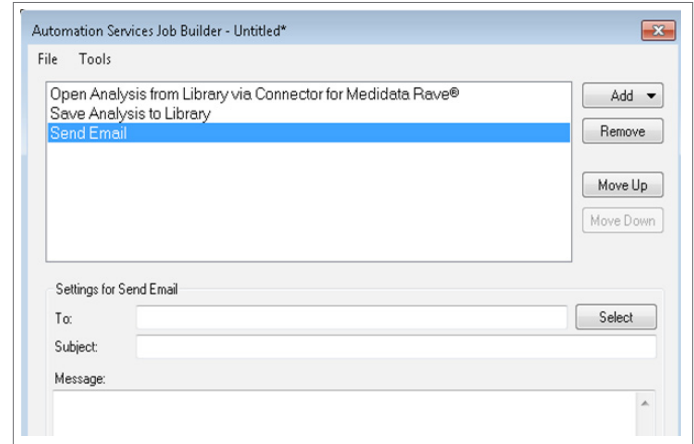

- Quickly export data from Medidata Rave® to enable faster review of data across all studies, accelerating the time to market for products across the portfolio of clinical candidates
- Reduce the time needed to enable data analysis workflows by moving away from file-based data extracts and manual processes
- Benefit from CDISC ODM standard which facilitate the regulatory-compliant acquisition, archive and interchange of metadata and data for clinical research studies
- Better decisions based on EDC source system data

ATTRIBUTES AND CAPABILITIES

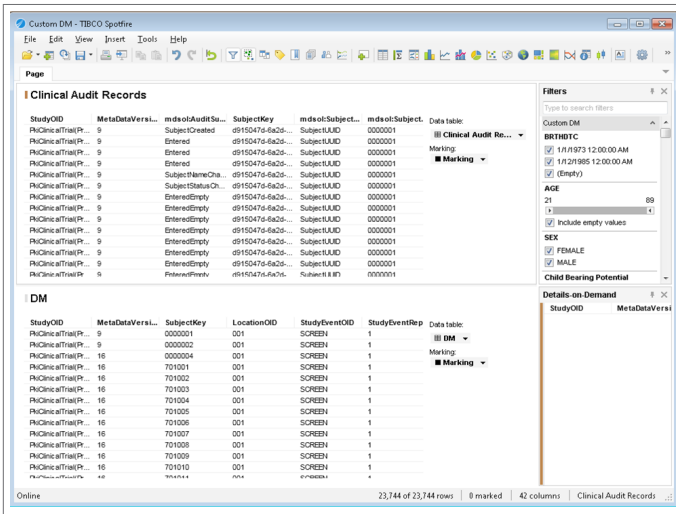

Intuitive User Experience

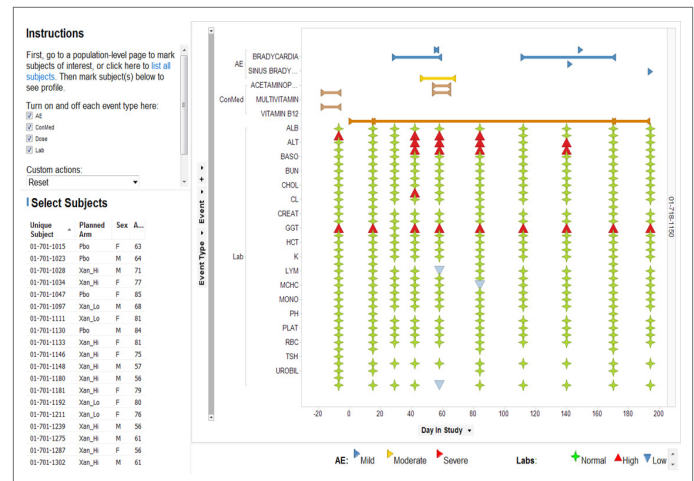

Built-In Automation Capability

Access Clinical, Operational and Audit Data

Medidata Rave® Connector Populating PerkinElmer's Clinical Data Review Solution (sold separately)
