Alkaline Phosphatase Labeled Affinity Purified Antibody to Rabbit IgG (H+L) [Goat]

**Product Number:** NEF814001EA

**Description:**
Affinity purified antibody, isolated from a pool of serum from goats immunized with purified rabbit IgG was labeled with phosphatase using a modified glutaraldehyde procedure.

**Form/Storage:**
Liquid. Store refrigerated at 2 – 8°C.

**Content:**
Each vial contains 1.0 mL at 1.0 mg/mL of affinity purified antibody from unlabeled antibody

**E/P Ratio:**
The calculated enzyme/antibody protein ratio: 2.40: 1

**Specificity:**
Tested by immunoelectrophoresis, gel diffusion and ELISA techniques as applicable. This product reacts specifically with rabbit IgG, heavy and light chains. No antibody is detectable to non-immunoglobulin serum components.

**Suggested Working Dilutions:**
Optimal working concentration should be determined experimentally. Prepare working dilution in TBS or other buffer such as blocking solution. These buffers are not recommended for long term storage. Suggested starting dilutions are as follows. **Note:** In many cases, the antibody may be diluted more than indicated.

- **Microwell:**
  - 1 / 2,000 – 1 / 10,000
  - 0.5 µg/mL – 0.1 µg/mL

- **Blotting:**
  - 1 / 10,000 – 1 / 40,000
  - 0.1 µg/mL – 0.025 µg/mL

- **Histo / Cytochemical Procedures:**
  - 1/400 – 1/1,000
  - 2.5 µg/mL – 1.0 µg/mL
PRODUCT SAFETY AND HANDLING
This product is considered non-hazardous as defined by The Hazard Communication Standard (29 CFR 1910.1200). Avoid contact with skin and eyes. In case of contact or spillage, clean with copious amounts of water. Dispose via sanitary sewer.

STABILIZERS AND PRESERVATIVES
Goat serum and bovine serum albumin added as protein stabilizer. No preservatives added. Non-sterile.

STABILITY
Product is stable for one year from date of receipt when stored properly.

COUNTRY OF ORIGIN OF ANTISERA
United States
